

Kirsten Trimaley

AI product developer and graphic designer

kirstentrimaley@gmail.com	github.com/YazeKT	South Africa
---------------------------	-------------------	--------------

Profile

Graphic designer with approximately ten years of experience, now working as an emerging AI product developer. Combines visual systems, workflow analysis, AI-assisted implementation, testing, packaging, and privacy-safe publication.

Selected product work

2026	dIME Product design, Electron development, resilient public-media recovery, packaging, verification, and open-beta publication.
2026	Nestform Modernized a Windows nesting workflow while preserving the upstream Deepnest engine and validating physical SVG/DXF unit boundaries.
2026	Atlas Reach Built a compact local-first CRM with spreadsheet imports, dense lead management, analytics, Excel exports, backups, and a strict no-scraper boundary.
2026	PinHarbor Designed and integrated a completion-driven Windows workflow, honest live progress, focused exports, and supervised Go/Playwright startup around an attributed open-source foundation.

Strengths

Product and interface design · Agentic coding direction · Local-first Windows products · Responsive web development · Release documentation · Accessibility and privacy boundaries · Evidence-led QA

Core tools

Astro · React · TypeScript · Electron · Node.js · Go · Playwright · SQLite · GitHub Actions · AI coding agents

Working approach

Understand the operator, protect proven behavior, make boundaries visible, validate the real package, and publish only what the evidence supports.
